The JPEG image file format has significant implications for the intended or likely use of the publication. This digitised format allows for optimal reproduction qualities of photographic images. The format facilitates proliferation and wide distribution of the image nationally and internationally among similarly oriented individuals, by private, electronic transmission to suitably equipped and networked computers.

Referring to New Zealand Bill of Rights Act 1990 issues, the application of s3(2) of the FVPC Act deems the publication objectionable. The limit on freedom of expression resulting from the classification is demonstrably justified and prescribed by law.
